Superintendent's Report

To the School Board of Weare:

I herewith submit my sixth annual report.

The statistical tables presented as a part of this report give a brief review of the work and general condition of the schools. Owing to epidemics of whooping cough and measles in different sections of the district the attendance record is below the standard of the past two years. It is not however poor record. In spite of all difficulties a great majority of the Weare children were attending to their school duties nearly every day.

The enrollment by schools table shows that 179 pupils, or 71 % of the total enrollment for the current year, are members of the more centrally located schools: namely the High, Junior High, North Weare, South Weare (store), East Weare, Weare Center and Rockland. All of these except the High and Junior High are now rapidly approaching the crowded stage. In these schools, if the room is suitable, with only six grades represented, 20 to 25 pupils can be handled efficiently. East Weare, with 25 pupils enrolled distributed through eight grades, is our most difficult problem at the present time.

The enrollment in the more remote sections of the district, as shown by the table previously mentioned, is very uncertain from year to year. At the present time all of these schools have a fair number of pupils for efficient administration. The present outlook is for a very small number at the Friends School next year. If this proves true, it will be good business policy to combine with the Clinton Grove School at Clinton Grove. The old academy building used in this section, is, in its present condition, very poorly adapted to the needs of a primary school. The light there is very poor especially on cloudy days and during the fall and early winter afternoons. The furniture is also in poor condition and very much out of date. I recommend

that a smaller room be portioned off from the large room now in use, and a much larger window space provided. The present ratio between window and floor space is far below generally recognized standards.

The window in the front of the Buxton School room is a source of real danger to the children's eye sight. We find it difficult to shut out all the light with the shade as at present arranged. I therefor recommend that this window opening be permanently closed.

Grange Hall at East Weare presents a peculiar lighting problem by reflecting a very bright light into the school room every afternoon when the sun is shining. This is especially annoying when the sun's rays are at a certain angle in the fall and spring. Since Halestown Grange is willing to coöperate in solving this problem, I recommend that the offending side of Grange Hall be painted some neutral color, which will not reflect the sunlight, as at present, at the expense of the district.

If the River Road School is to be continued, it will soon be necessary to either move the building or make extensive repairs on the present foundation. In any case new toilet facilities will have to be provided.

I must not neglect to mention as a matter of record, that the High School boys under the efficient leadership of Headmaster Leslie S. Cummings planned and built a school farm shop which is greatly to their credit, and which adds at relatively small cost, to the practical efficiency of the High School plant and work. The successful completion of this project is further evidence of the practical worth of the Weare High School to the community now, and to the future citizens of the town.

The High School grounds are in good shape, and the matter of having shrubs and small trees for purposes of protection and adornment should receive immediate attention. Here again the teachers and pupils are willing to help and do all the work necessary to carry out any plans which are

feasable and generally acceptable. I recommend that this project be given immediate attention so that a beginning of the good work may be made before the close of the current school year.

I further recommend that the High School walks be covered with cement. The foundations are without doubt in good condition for cement construction. This work could be done by the boys in connection with the regular class procedure as a practical project in cement construction.

The general exhibition of school work held at the South Weare Hall last November was well attended and evidently much appreciated. Having the exhibition here instead of at the Center this year was a distinct advantage to the schools of the Southern section of the Town and is a great convenience to many in that section who are much interested in the schools. Since the Town of Weare is so much divided, it would seem from our experience last fall, advisable to have many school functions in different parts of the town, wherever adequate facilities could be provided. I would therefore suggest that some of the graduating exercises of the Weare High School be held at East Weare next June, and the following year at South Weare, and thus bring these very interesting exercises to people who would otherwise be unable to attend.

The State Board of Health in accordance with the State Law has given instructions that all children in the public schools shall be vaccinated. Under modern conditions with so much freedom of travel between states and communities the enforcement of the vaccination law is absolutely necessary. The smallpox epidemic in Connecticut emphasizes the importance of this protective measure. Without doubt all unvaccinated children who have not complied with the law will be excluded from the public schools next September. It will be best for all in so far as possible to be vaccinated before the end of the current school year. The

State Board of Health is willing to give free service by one of their own experts according to the bulletin already distributed.

In closing I wish to express appreciation of the loyal and hearty support of all concerned in the work of Public Education.

Respectfully submitted,

GAIUS H. BARRETT,
Superintendent.
